Painting progress

Time to get my misc sci-fi done. I've undercoated everything I can so far, barring my collection of Xenomorphs. I've still some painted Tyranids left that can fulfill the same role (and Xenomorphs are boring to paint).

Ape Gang

Megacity criminal gang from the Judge Dredd Miniatures Game. **fully painted**

City Defence

Megacity militia from the Judge Dredd Miniatures Game. **undercoated**

Demonic Cabal

Megacity criminal cult from the Judge Dredd Miniatures Game. **undercoated**

Mad Max

Either Mad Max inspired or Necromundan punks. **undercoated**

Mercenaries

Male (mostly Games Workshop) and female (mostly Shadowforge, some Bombshell) misc modern or

futuristic armed figures. **males mostly painted, females undercoated**

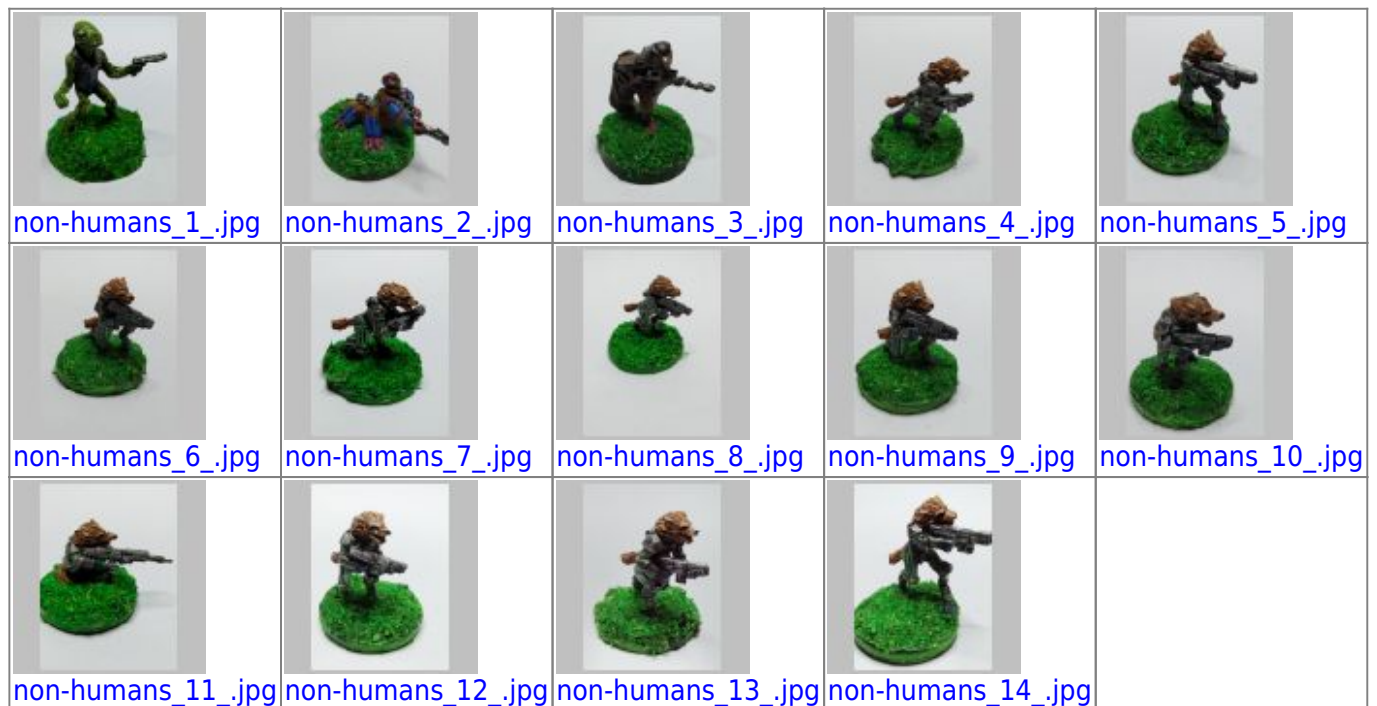

MIB

Men In Black inspired minis. Some Heroscape, some Cyberpunk. **basic painted**

Non-Humans

Misc Traveller and Battlestations and other manufacturers, some non-humanoids **some fully painted and some undercoated**

Predators

Male (Prodos) and female (Predastore) minis, the Prodos are a larger scale but can still work. **undercoated**

Renegade Robots

Megacity rogue robots from the Judge Dredd Miniatures Game, Walter the robot and various other robots. **partially painted**

Street Punks

Megacity punks from the Judge Dredd Miniatures Game. **fully painted**

Strike Force

Plastic power armoured from an unknown company, may be good as Unity troops. **undercoated**

Tyranids

Last minis I have left from selling at CanCon. Games Workshop. **fully painted**
