Production of [Saehimnir](#), the precious life-giving fluid of the EINHERJAR also takes place at Valhalla.

Asgard, Planet

The planet Asgard is a distant, cold world, with little to distinguish it from hundreds of other planets. It has high metalicity, near-frozen seas and plains of ice. Creatures on Asgard grow to enormous size and evil temperment. Humans born on Asgard are naturally stronger, due to higher than normal gravity.
