By Lawnmower Boy ([original post](#))

Someone keeps posting handwritten “word salad” scrawls on walls in the lobby. It looks like there's an untreated schizophrenic on the loose. Of course no-one sees the poster. What's frightening is that it seems as though various untoward events are foreshadowed in the postings. One day the “topic” is pyramids, the next day a travelling rep for Steve Jackson Games disappears. And then one of the PCs wakes up in the morning, babbling incoherently and talking about how the voices in his head say that you're next.
