

Test Viewer

PHP code to read the HDC files.

```
<PHP> function parseHdcFile($filePath) {
```

```
    // Check if the file exists
    if (!file_exists($filePath)) {
        die("File not found: $filePath");
    }
```

```
    // Read the XML content from the file
    $xmlContent = file_get_contents($filePath);
```

```
    // Parse the XML
    $xml = simplexml_load_string($xmlContent);
```

```
    // Extract character information
    $raceName = (string) $xml->CHARACTER_INFO['CHARACTER_NAME'];
```

```
    // Display the character information (you can modify this part)
    echo "<p>Race Name: <strong>$raceName</strong> </p>\n\n";
```

```
    // Add more information as needed
```

```
    // Example: Display Characteristics
```

```
    echo "Characteristics:\n<table><tr><td width='120px'>";
    $count=0;
    $base=array(10,10,10,10,10,10,3,3,3,3,2,2,2,4,20,10,20,12,4,4);
    foreach ($xml->CHARACTERISTICS[0] as $stat) {
        $statName = $stat['XMLID'];
        $statValue = $base[$count]+$stat['LEVELS'];
        $count++;
        echo "<strong>$statName</strong> : $statValue <br />";
        if (intval($count/4)==($count/4)) echo "</td><td width='120px'>";
    }
    echo "</td></tr></table>";
```

```
    echo "<pre>"; print_r ($xml); echo "</pre>"; Add more sections and details as needed
```

```
    }

    Example usage $files = glob('./data/media/roleplaying/hero/ws/6e/*.hdc'); foreach($files as
    $fileName) { parseHdcFile($fileName); echo "<hr />"; }; </PHP>
```
